# What brings Democracy? < South Africa, Botswana, and Kenya compared >

Takuma Andoh & Bomi Kim

# Democracy? Democratization?

- Democracy: "Ruled by People". A system of government where the
  citizens exercise power directly or through electing representatives in
  order to form a parliament. \*Main Charateristics: Political freedom,
  Rule of law, Equality before the law, Majority rule, Free and Fair
  elections.
- Democratization: A process which leads to a more open, more participatory, less authoritarian soceity within a sovereign state.

# Background Research 1 - Measuring Democracy

- US-based Freedom House Organization: aggregates scores of 25 indicators from politial rights and civil liberties in order to evaluate the state of freedom \*2016 Report: Out of 195 states, 125 countries are classified as electoral democracies.
- The Polity Project: examines qualities of democratic and autocratic authority in governing insitutions to observe a spectrum of governing authority.
- -> We used "Polity Score" data from the Polity Project for our dependent variable

# Background Research 2 - Democratization in Africa

- Third Wave (1974-1990): Durig the Third Wave of democratization, over 60 countries throughout the world changed their authoritarian regimes to democracies.
- Repetition of the onset of democratization and frequent slips back to authoritarianism in Africa.
- Making progress towards democracy by improving socioeconomic features and revolting against authoritarian leaders

#### Selection of Case countries

- World Economic Forum's Global Competitiveness Report 2015-2016: assess the competitiveness of 140 wolrd economies based on 113 indicators such as macroeconomic environment, health and primary education, goods market and labor market.
- Africa's top performers include Mauritius, South Afirca, Rwanda and Botswana
- Africa's low performers include Liberia, Sierra Leone, Ivory Coast and Ethiopia

-South Africa (49th), Botswana (71th), Kenay (99th)

# Research Question and Hypotheses

#### < What brings democracy? >

- Investigating the effects of various socioeconomic variables on democratization in African countries.
- Analyzing the correlation between socioeconomic components and democracy.

#### \*Three Hypotheses

- There is a significant and positive correlation between socioeconomic variables and democracy
- Among four socioeconomic components, the educational effect on democracy is the most significant than others.
- The degree of impact of variables on democracy is consistent across selected African countries.

#### Democratization level has been changeing over time

# **Findings**

- There is a significant and positive correlation between socioeconomic variables and democracy
  - Child Mortality and Primary Education have statistically significant and positive effect on democracy
  - Gender equality has negative effect on democracy
  - GDP is not statistically significant
- Among four socioeconomic components, the educational effect on democracy is the most significant than others.
  - TRUE
- The degree of impact of variables on democracy is consistent across selected African countries.
  - Inconsistent!
